Continue to this website (not recommended).

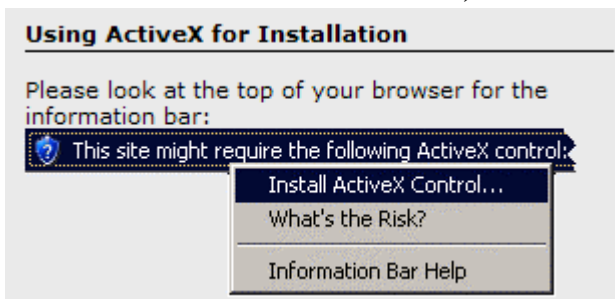

4. Enter your hospital user name and password (not your healthland password) and click Login

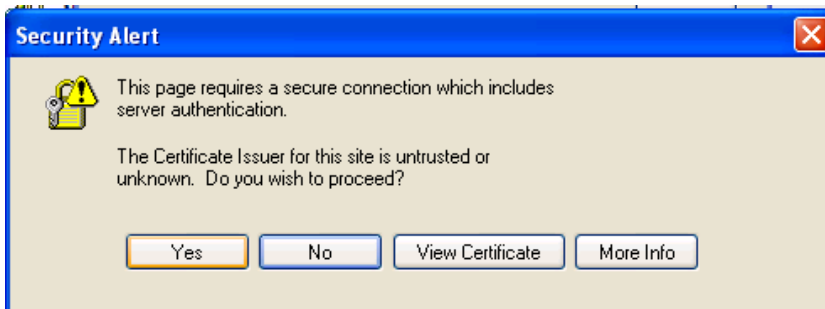

The screenshot shows a web form titled "Login". It contains the following elements:

- A header bar with the text "Login".
- A prompt: "Please enter your username and password."
- A "GROUP:" label followed by a dropdown menu showing "STJO_SSL_VPN".
- A "USERNAME:" label followed by a text input field containing "mshook".
- A "PASSWORD:" label followed by a text input field with 12 black dots.
- A "Login" button at the bottom.

5. At the top of your browser you will need to right click the information bar and Click Install Active X Control,

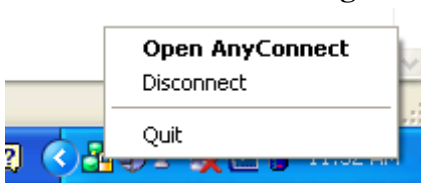

6. You might get a Security Alert asking you to proceed. Click yes

7. Once your installation is complete you should get a connection established screen

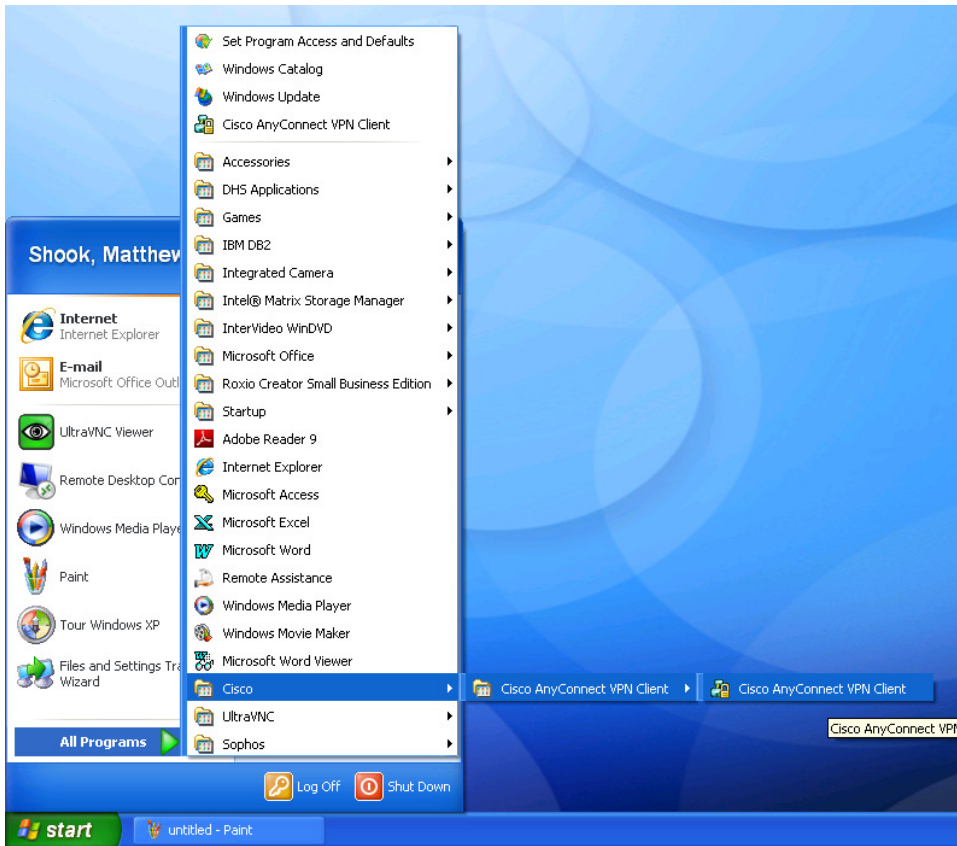

8. Once you are done with your VPN connection right click the Cisco AnyConnection icon on the bottom right hand corner of the screen, and select disconnect.

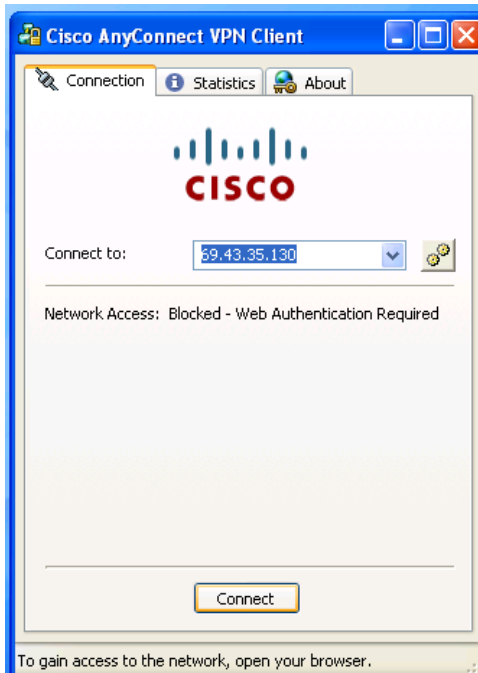

How To Reconnect to the VPN after Cisco AnyConnect has been installed

1. Click Start → Cisco → Cisco AnyConnect VPN Client

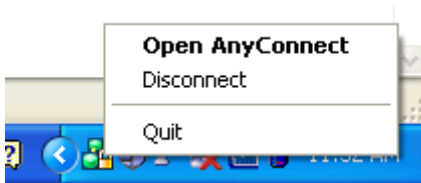

2. Make sure Connect to shows “69.43.35.130” then click Connect

3. You might get a Security Alert asking you to proceed. Click yes

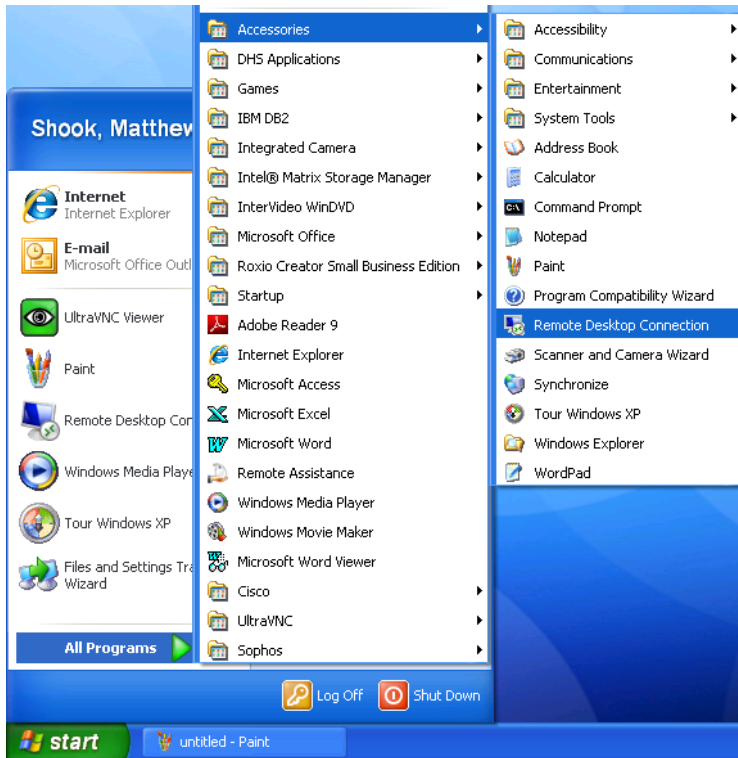

4. Once you are done with your VPN connection right click the Cisco AnyConnection icon on the bottom right hand corner of the screen, and select disconnect.

How To Remote into your Desktop

1. Click Start → Accessories → Remote Desktop Connection

2. Enter your desktop computer's name (ex. IS1234), Click Connect

3. To disconnect from your desktop move your mouse to the top center of your screen and click the X.
